# Hello Outsiders.

**Sometimes it is good with an Outside perspective. We at Brafab know that. Because what we do best is outdoor furniture, and we know what it takes to spend a lifetime outdoors in a way that is comfortable and enduring, both in form and function.**

## **Brafab's Outdoor Furniture Journey**

Brafab's history goes back a long way and we have a great heritage to build on. We started as a small family business back in the 1930s and today, we have grown into one of Northern Europe's largest outdoor furniture brands. However, we are still just as keen on the interplay between comfort, design and practicality, which is fundamental when we develop our range. Details, materials and the perfect proportions are what create outdoor furniture you can sit comfortably in and enjoy for a long time.

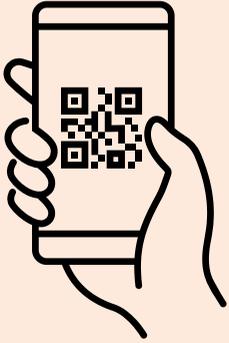

We also feel the need to contribute to an environmental friendly product process and to do what we can for the environment, people and society when it comes to sustainability. This means creating outdoor furniture that lasts over time, both in form and function.

## **Brafab range**

A product range with a wide base that can be combined endlessly is the foundation of Brafab's product development. We are one of the leading brands for outdoor furniture, and we devote ourselves to develop our range from year to year. In recent years, our outdoor environments have become increasingly important to us. What used to be just a simple patio has today become an extra living room that we enjoy as soon as the weather permits. Brafab draws inspiration from the outside world by monitoring and trying to predict upcoming trends and orientations.

We believe that it is important to add playfulness and hope into our daily lives, which we want to reflect in our outdoor furniture. So, could 2025 be the year you add distinctive colors like Indigo Blue, Nordic Green, Zin Red, and Lemon to the more traditional outdoor furniture shades?

The back legs of an Adirondack chair are an extension of the seat itself, which makes it comfortable and gives it a slightly backward tilt and support for the head.
