FURNITURE FOR LIFE OUTDOORS

**Welcome home. Or rather, outside.
For those who prefer life under the open sky –
and know that the best spot at home is often
the one without a roof.**

Sometimes an outside perspective is exactly what you need. At Brafab, we get that. Because what we do best is outdoor furniture – created for a life that lasts beyond a single season: comfortable, deliberate and shaped to stand the test of time. With our 2026 news, we continue the journey from indoors to outdoors, where the outdoor space is no longer an addition but the home's most vibrant room.

From front garden to back garden, from compact balcony to generous lounge – this is where growing, cooking and gathering come together in outdoor furniture built to withstand everyday use, weather and real life. Functional solutions meet flexibility, and new ways of using the space open up more opportunities to be outside – more often.

The 2026 collection carries even more warmth, with wood, soft material contrasts and a balanced palette where organic and clean lines come together in a calm yet expressive aesthetic. Comfort has been further refined with new cushions and textiles that elevate both feel and form. Inspired by the southern European Riviera, we have interpreted it in true Brafab style – as a tribute to summer, for all outsiders.

Welcome home. It's time to move outside.

The people behind the **DESIGN**

Every shape, every line and every material choice is the result of thoughtful design. In the 2026 collection, our designers have drawn inspiration from the way we truly live outdoors – from quiet moments in the shade to long get togethers that we never want to end.

We spoke with the designers behind this year's new designs about the ideas, feelings and thought processes that inspired them.

JOHAN SKOOGH

As an external design partner, Johan has left his mark on several of Brafab's new releases.

"With the 2026 collection, I've focused on the atmosphere the furniture creates. In both ARTS and BOLSTER, my aim has been to give each piece a distinct feeling and character that enhances its surroundings."

PAUL THUR

Paul works as Product Manager at Brafab, leading the design and development process.

"Designing products for outdoor growing and cooking has been a real joy for me this year. It shows how Brafab embraces everything that summer life invites us to do."

TOMAS OLSSON

Product developer with a particular focus on materials, performance, durability and function.

"For me, customer needs and our curiosity about new materials have been central to this year's launches. The result is furniture that is thoughtfully designed and carries a clear Brafab identity."

CARE GUIDELINES

Outdoor furniture from Brafab is made to last – and to be loved for many years. With the right care, they retain both their feel and quality over time. Since different materials require different types of maintenance, we've gathered our best care advice on our website.

Read our care guidelines on the website.

NEWS 2026

This year's new arrivals – designed to inspire and make you want to step outside.

Brafab X Gaber

A good blend of functionality and aesthetics; that's outdoor furniture in plastic from the Italian brand Gaber. Innovative design and advanced manufacturing techniques result in outdoor furniture with beautiful shapes, vibrant colors and textures; furniture that is lightweight and weather-resistant, making it ideal for enhancing any outdoor environment. Gaber's outdoor furniture is designed to fit both private and public outdoor spaces.

PARASOLS & PERGOLAS

The sun is wonderful- but sometimes the shade is the best.
Parasols and pergolas add cooling comfort, protection and ease to outdoor living.

SHADY (page 134) looks like a side table but works just as well as a parasol base. In the image, it's shown together with the **ABRIOLA** parasol.

Tips when buying furniture covers

Outdoor furniture is an investment in your outdoor space, and it's meant to last. With the right care and protective cover, you can enjoy it for many seasons – a smart choice for both your budget and the environment.

Our furniture covers make it easy to preserve the quality of your furniture, no matter the weather. They fit the majority of our range and work for everything from dining and lounge furniture to parasols, outdoor kitchens, and sun loungers.

Protect what you love – your outdoor furniture deserves proper care.

THINGS TO CONSIDER WHEN STORING YOUR FURNITURE

- Always clean your furniture before putting it away for the winter.
- Allow the furniture to dry completely before covering it with a protective cover.
- If possible, store your furniture under a roof or raise it slightly to avoid moisture, for example by placing extra paving slabs underneath.

MATERIAL & FUNCTION

- Both our “breathable” and “waterproof” covers are made from PFAS-free materials.
- All materials are UV-treated to provide increased resistance to fading.

Breathable furniture covers

Made from durable RIP-stop polyester with a TPU-coated interior. They feature taped seams that make the covers waterproof while allowing condensation to escape and blocking moisture from the outside.

Waterproof furniture covers

Made from fully waterproof polyester with a felt-coated interior. The material and construction are waterproof and do not breathe, which is why these covers have ventilation pockets for improved airflow. This type should not be used on wooden or fabric furniture.

IMPORTANT VENTILATION ADVICE

- There should always be air between the cover and the furniture so that air can circulate. This is especially important to prevent mould and mildew – particularly on wooden or fabric furniture. For these materials, we always recommend a breathable cover.
- You can, for example, place an upside-down pot on the table to create extra air space.

HOW TO CHOOSE THE RIGHT SIZE

- Choose a furniture cover that is slightly larger than the furniture itself. Measurements can be found in the catalogue, on our website, or on the packaging.
- Remember to allow space for chairs when selecting a cover for a dining set.
- Measurements for corner sofas are based on the seated perspective: the first width is the left side, the second is the right.

SMART DETAILS

- Elastic straps at the bottom keep the cover in place in windy conditions.
- Many of our furniture covers are equipped with a waist strap to ensure the cover stays secure even in strong winds.
- Covers for sofas and dining groups also include hook-and-loop straps in the corners for added fastening.

CAN I LEAVE CUSHIONS UNDER THE FURNITURE COVER?

We always recommend storing cushions indoors to avoid odours and prolong their lifespan.

HOW DO I CLEAN MY FURNITURE COVER?

Stains can be removed with soap and water or an appropriate textile cleaner.

STORING THE FURNITURE COVER

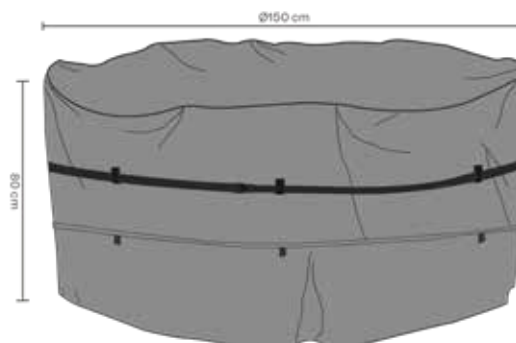

When not in use, the cover can be easily stored in the included storage bag – our “sailor bag”.

2493-820	FURNITURE COVER recliner set	W190 D95 H100 cm	Black - Breathable	Ripstop Polyester	6
2493-830	FURNITURE COVER recliner set	W190 D95 H100 cm	Black - Water proof	Polyester	6

**Tip!**

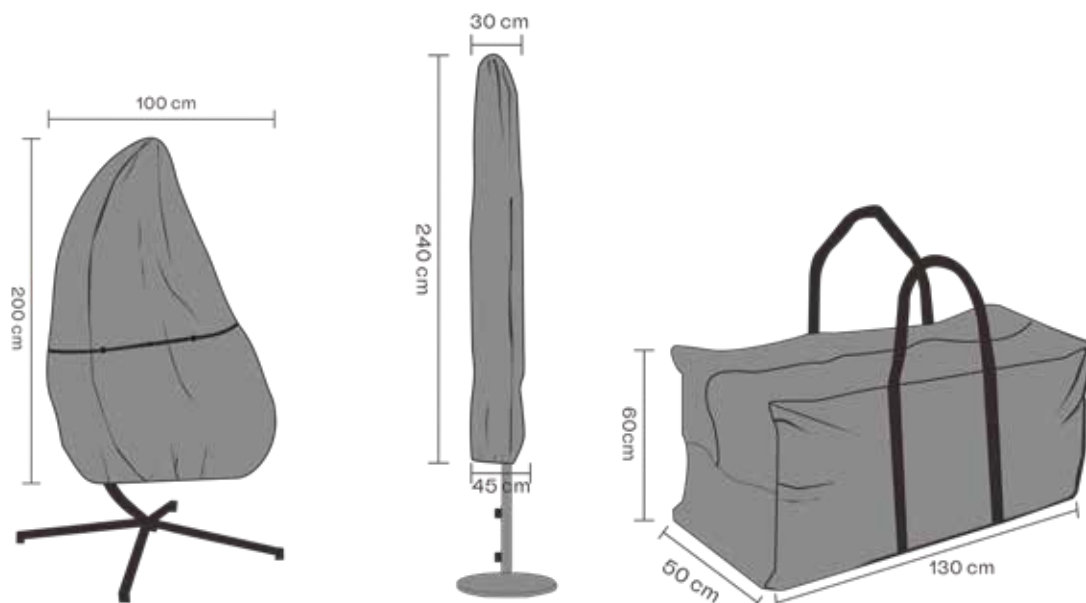

Place a pot or something similar on the table before putting the furniture cover on. This prevents the fabric from lying directly against the tabletop and allows for better air circulation.
